

30 SEP 86

SESSION SUMMARIES

MORNING

SITE 1.....FACTORY

..... Still having problems identifying man-made structures/
 complexes..... all elements of site were identified during the session
 but viewers' ^{ANALYSIS}interpretation of the site was ^{OVERLAPED}blocked by AOL..... Especially
 stage I gestalt..... Stage II's were much better... crackling sound...
 burning small... warm, hot... sandy, gritty... angles.....
 AOL of volcano..... if this were a steel mill the AOL would be very
 apropos..... A.I. - do not want to taste... hot, burning
 sensation..
